Hi just updated my antivirus program and got a virus warning when Renguard tried to start.

C:\WINDOWS\SYSTEM32\SVKP.SYS

Is the Trojan horse TR/Pakes.2

I am using AntiVir® PersonalEdition Classic/xp

I checked their forums and others are having problems not just with renguard but other apps as well. I'll have to wait for an update before I can get on the renguard network again but I thought you may want to know.

Trev.
