ok... um... the no cd pach just lets you play without the cd, you just klick cancel when it tells you you need the cd and your done

as for renguard...

uninstall renguard using the add remove

then check if you have game2.exe and game.exe and see how big they are keep the one that's about 4-5MB and delete the other one and make sure you name this 4-5MB file game.exe. If you only have about 300KB game.game2 delete them. If you have no game or game2 then dl game.exe from the link in the post above.

now

zonniesOpen the registry editor and goto:
HKEY_LOCAL_MACHINE\SOFTWARE\

Delete the 'key' (folder icon)

RenGuard

Run the renguard installer again and there should be no problems anymore.

if this doesn't work i know 1 other thing you can do.

PS: just remember how renguard works it's program that starts b4 renegade and has to run while you play renegade. Renguard actualy is what starts renegade using the (Renegade) button on renguard.
