G'day folks!

When trying to install Renegade (I havent for a couple of years now), the progress gets to about 20% and then a error box poops up saying "cannot find always.dat, make sure you have the right cd in the drive." I looked on the cd, and there is no always.dat file!

Could someone tell me where I can download the original always.dat file, and where it should be located on the cd? I might be able to mount the lot and install my renegade.

Cheers!
