JoeyAhem....

EVERY map ack has made ive edited, RA1 mod ive majorly edited, working on your models to scaledown size and poly count to use in generals.
so im taking, but not releasin to public....Im not TO criminal.

ACK, you must be a rich kid with no life who has fools for friends.... thats why you wanna boss us around... but still thats clearly glacier...

If you don't like his maps then don't use them -period. However others stealing maps and making minor modications without creators consent is lame, immoral, stupid, sick, n00bish and maybe illegal.

If Captkurt01 wants to make maps, fine - he can... but I feel that stealing someone elses map is wrong. What makes it worse in my view, is that he has failed to ask or gain permission to use/modify the maps AND WORSE STILL LABELS IT AS HIS OWN.

Since Captkurt01 did modify/steal that map which belongs to Ack I believe that he isn't behaving like a "ACK, you must be a rich kid with no life who has fools for friends.... thats why you wanna boss us around..." but a person who has been witness to someone stealing his work....

He and others has given much to this community with maps, mods, programs, server admin utils. It is typical of n00bs not to recognize the effect placed in it.

BTW its Nod not NOD.... see renegade next time you load it -_-
