click on 'mod' for the preset and remove the 'M00-Disable_Transition'.

westwood put this on most models, it prevents you from entering vehicle models. I would guess thats why you cant get in, although I dont know if the model has all the bones etc nessicary to actually use it when u get in...

EDIT: btw, you should probably copy the model as a 'temp' and then make your changes, or it will only work on a .pkg type map
