IRON FARTicedog90*Sigh* you just had to get the 9200SE. That card sucks ass just so you know.

It's a budget card...What do you expect from it? It costs like 30 bucks, and for sure it is way better than integrated graphics.

It's no Dual 6800 Ultra that is directly connected to a miniature powerplant, while being submerged in an ice bucket, but it's better than integrated.

For one thing, you don't understand what you're talking about. Chances are, he bought it at a retail store, who price it at \$100 at least (I've recently seen the price). With \$100, you can easily get a much better card than the 9200SE at some place like Newegg.

And another thing, please don't exaggerate.

<http://www2.newegg.com/Product/Product.asp?Item=N82E16814102409> - A 9600 Pro for \$70. That card is even better than mine, and it's only \$40 more than your "suggested" price for a 9200SE.
