half3lif3ok... here it goes, yesterday I thought of getting a new graphics card, but my budget for it is at 1600 CAD, and I thought of buying the XFX 6800GT, and I thought of getting an SLi motherbaord so I can have two graphics cards combined! (As you all know SLi takes two graphics cards).
But one problem I encounterd was that if there is any SLi motherboards manufactured or made for my CPU. If you can help in any way, it will be greatly apped'.

And here is the information for my CPU:
Intel P4 C
3 GHZ / 512 Catch / 800 MHZ FSP
Socket 478
