rm5248ideboWoa! What's next? A fishtank-CPU?

Actually, pure water doesn't conduct electricity at all. Water will only conduct electricity if something is dissolved in it. (I.E. some sort of acid or base)

So you could probably do that.

Or an acid and a base

Acid + Base ---> HOH + Salt

gbullThe ScreenSavers/Attack of the Show r0x!

Used to.
