Its not renguards fault, it is usually an excuse the n00bs use when they get killed. I don't have a fast comp, I run the game on low detail and I still use Rengaurd. When I '!forcerg' people I make sure that they are in fact cheating (eg. always being shot in the head numerous times while ducking behind or being blocked by an object and KNOWING where he is). Mostly if you are accused of cheating and they check that you have renguard, it usally stops there. I realise it can be frusterating when you are kicked just for being good, but there are gonna be people who won't believe you aren't cheating until you have rengaurd, it sucks. Reneguard has brought more good then bad, you would be better off using it.
