SpoonyJeep RubiRengaurd doesnt really stop cheating (I tested it) i could get big head and repair gun flame working. All renguard does is cover up the cheaters and give them an excuse to say they are not cheating.

I get the weird feeling you're full of shit.

Perhaps in him doing it, or doing what he said, but the concept of altering the game or using an aide while RenGuard is running is more than just feasible but also very possible. Those who have the knowledge don't have the intent. Those who have the intent don't have the knowledge. RenGuard may stop the idiots but it doesn't stop the true hardcore cheaters. Luckily those types of cheaters are next to non-existant in Renegade. Face it: the game just isn't worth bothering to most.

All you really need to concern yourselves with is stopping people who know how to use officially released tools and software to alter a file or make a new model and place it in their data folder. Granted those are cheats, but not the cracks I am discussing - the ones RenGuard fails to stop entirely.
