All i get is a big blue box that just sits there tring to load, but turns white in a min or 2 then stops responding. If u could tell me how to do a screen shot, i'll post it with my next reply. I have tried uninstalling and reinstalling Renegade then installing renguard, but the hasn't helped at all. So i'm out of ideas. Anyone else out there that can help, i'd greatly apreciate it.
