GeTSm0keDas far as making sites in wysiwyg editors..
form pages are the only problem i have.. there just never right..

EXCEPT IN IE! then their normal, hah

i havent had time to go back and fix up the rest of my lil BS sites..

So...

Don't use a WYSIWYG? If it doesn't work well at all cross-browser, it's not the browsers fault, it's obviously your fault. It is up to the HTML coder to make sure it works in all browsers PROPERLY, even if it might have a few cosmetic defects.
