---

hi,

My stupid brother did something to our pc and now we are banned.

The ban is from a very very long time ago, cause he uninstalled renguard and blocked somehow the site and download thing.

He is gonna play on a other pc with a friend's serial.

So my question is, can you just let me play with renguard somehow ?, cause i can't play with renguard, and sometimes i play in clanwars and i need renguard but then i can't play.

I think i need Mac or someone, but i don't know who the leader here is ?

greetings
