Gotta love it when you rip off the TS menu because you can't replicate it yourself.

The infantry animations are all stock Renegade, notice a part where a soldier is using his arm to wipe his mouth off. That's wonderful, show us a bunch of animations that barely apply to Recorn: The Ultimate Corn Harvest! Especially ones that don't even fit a soldier wearing a full head helmet.

It's also amusing how some of the animations show the shoulder armor clipping into the soldiers' arms. Great forethought in making those characters!
