KanezorHe has a bot on IRC, probably the prerelease version of TSR, which shows him who connects and disconnects from the n00bstories TeamSpeak server. Plus, he's connects to TeamSpeak himself and can see from there.

Maybe a poll should be generated to see who would find it useful, if there's any doubt as to the numbers.so only ppl who use n00bstories (which is prolly full with retards) use TS? Everybody can host there own and this tool can be used for more games. So it would make more ppl happy then the ammount that play renegone.
