They aren't cheating you out of your share, Aircraftkiller. You've had plenty of your maps added to this and the last patch. They also voted fairly. Like I have said before, they have voted here because they want to see Deth\_River added to CP2, over the other maps there. They've had to look at the other options in the list, so if they see anything else, then they have the free will to choose something else. They don't have a gun aimed at them.
