cowmisfitglyde51cowmisfitj_ball430cowmisfitHey hey now guys, I wouldn't mind getting one either, he's just asking in the wrong place. you have to understand when you say "don't warez somthign iomfg" how many people in the world do you think have actually paid in full pay for programs such as 3D's Max and Photoshop CS That cost 4000 and 900 dollars, especailly most of the kids you see on the net designing art ? Not a whole lot. Don't be so hard on the dude. Photoshop CS only costs \$650, but I BOUGHT it at the Educational price.

Im 16 i don't have the money to even pay that much. I would pay 100 150 at max. And as for 3D's Max goes, 4000 dollars is a fucking car.

I used Photoshop Elements 3 for a bit, I don't know if you can slice and dice though... but it was good for standard signature making and such.

And that has anything to do with what i said because?? This is why i want you banned from the ApocForums, your a spammer elite. Look at my member number and join date and post, then look at yours. You fucking suck.

It has a ton to do with that, Photoshop Elements Three is very cheap. Just because I live here doesn't mean you need to get all vulgar, though apparently you must think that everything someone says to you is an insult, you volitile bastard.

And I thought you banned me for nagging staff because he was taking his sweet time with that template. Are you flip-flopping your reason for my temp ban that was lifted? Or was it even meant to be temporary?
