I'm no expert!!! However, I personally would try to reinstall the patch. You should download the Renegade_v1.037_English patch to a folder on your desktop for future use. I have uninstalled and reinstalled renegade several times in the last 2 months trying to get the new scripts and rengaurd to work properly. It is nice to install the patch without downloading it every time. If that doesn't work then I would do the good time fun uninstall reinstall.

game/patch_v1.037_English/rengaurd/cp1

Good luck
