AlkalineDamn,
you guys obviously have no idea what you are doing.

DethRiver has some crackhead crouching warping hidden lag mojo going on.

We took it off the UNRULES New Maps server because their is a ton of crazy lag on that map. Its just as bad as Oasis.

Now don't get me wrong, its a cool layout but the lag is too intense on it.
Yeah, the fps-lag is a know issue. However, I was told all bugs would be fixed before maps are put into Core Patches.
