The mammy is VERY good in a lot of defensive areas. Look at hourglass for example. You lose your AGT. Two mammies can defend your base. Try organizing meds to do the same thing. Mammies do a much better job. Also the mammy repairs itself. this in turn prevents you from having to leave your tank as much if you have a n00bish team who won't help repair the last few vehicles(when WF's destroyed).

I would use a mammy but only in certain times. Overall I would choose a med. It all depends on the team however.
