Nice screens. *downloading*

Edit: Wow! Great map!

I really like the way you made it, the music fits nice in it too! But like you said not really music for a game like renegade.

It reminds me of some adventure/MMORPG games.

The only thing I have to say is about the water, it doesn't look too real, both animation and texture itself (maybe you should have made it a little light blue, just my opinion) look a bit bad compared to the rest of your map.

The fountain healing players is nice too

And I even got lost for a minute in there, and that's nice for a DM map!
