Holy shit you really are the hacking haxxor. Trojaned my PC. Sinds when is grabbing a password exposed on GX called Trojanning somebody's PC? Congratulations you just proved yourself you can copy & paste a word to a Text Form. You also proved yourself to be a big fat liar.

PS: You just made one really bad mistake that every Renegade server will suffer from. The next big Renegade Terror Action that will be noticed by everyone comes from me. And you will all know then thats its because of this guy lying his ass off and Ren Staff being really immature.

Renegade Community shouldn't be ran by such immature people.
