glyde51 wrote on Sat, 04 June 2005 19:06 That's just one theory, that everyone plays off of. There can be a number of other ways that Science has yet to find.

Ya I understand that, but since a lot of scientists that I have seen teach it that way, while also teaching how spontaneous generation is not possible kinda makes them hypocrites in my eyes. But anyway, it is only one theory, but it is that one theory that was taught to me as a kid in school.
