It's me. And my revenge will be sweet. A few servers already noticed, but that few will change into many and then into all servers. And Ren Staff is definitely included with this incident. If you were responsible mature staff you would not allow this thread. We don't even allow this on UC if somebody from Cheat would expose an Anti-Cheat. This shows again you are just immature and do anything to fuck Cheat up.

The Official Renegade Community is rend by a bunch of immature adults who are addicted to games. You guys won't even try your best to moderate the forums. I wouldn't even call this The Official Renegade Forums no more. More then 50% of the posts here are about something else and most of the times you guys just rape people with bad words if they say ONE thing wrong. But regular members think it's no problem and have no problem to swear and call bad names to new people who are not familiar with forums and stuff (cause C&C Renegade is full of n00bs anyway).
