Quote:You were not the victim of something.

yes i have been, and i don't know you and have never done anything to you. You have come on my servers and ruined the game. I have had no way to get rid of you so i had to shut the server down each time, seeing as they cost allot of money to just sit there telling the time i would say i have been the victim of something.

Quote:You could DDoSed me off, there were capabilities for you to get rid off me. All you need to be is smart enough.

I do not have a botnet, and i would not like to go down that road. And why should I be spending time trying to find ways of getting rid of you? I just wanna have fun and play renegade.

Quote:I was a victim of something. It was not a fair fight for them to take my passwords and do damage. Unless they actually hacked me I wouldn't had cared so much, the fact that my passwords were even posted public and with all these responding... that did push the line. People bragging around they trojaned me while not, doing damage to my stuff,... Makes me wanna get back at something that has to do with Anti-Cheat (anything not with Cheat Community) UNFAIR. I am finding it hard to have sympathy for you when you are threatening to wipe out all renegade servers, and have also been attacking my servers with cheats. But in anycase, what has this got to do with me?

Quote:You got me unfair, I take you back unfair.

No i didn't, i have done nothing to you. But you have got me unfairly.. there was no warning of the no name cheat, so how am i supposed to get rid of you when it took the most talented people that are left in renegade weeks to come up with a fix?

Quote:I did not personally effected you.

But you have personally effected me and my servers with your cheats.

Quote:I did not tried to humiliate you, damage a big responsibly of yours  
490 dollars a month is a big responsibilty, in my opinion bigger then a position as mod on a forum.

What the hell has any of this got to do with me, or infact the rest of this community, most people hate you witout knowing you because they know enough already.. you cause them a headache and mess there servers up that they work hard for to pay for.

I wish you would leave us all alone.
