How could the neighbours dog get your cat.

A cat normally is way more agile, flexible and even faster on a territory where it could hide or climb up (under).

So I guess it was on free field? Or just just didn't notice it was getting old and just wasn't able to escape anymore...

19 years! The Methusalem in the "Cat Crew".

Guess it is in abetter place now, where it catches mice all day long...
