CommandoSR wrote on Sun, 12 June 2005 13:06The demo doesn't work with Ati cards.. it just crashes back to desktop on startup.

Well, did you update drivers and stuff? there is threads and stuff to find out what driver you need for your card. If you have a card from 8500 till now then it should work.

I know its a demo, but for a demo this is buggy as hell, and this is really show EA is just for the quick money. But they forget that alot of people still use The Geforce 4 cards. So they are losing alot of costumers.
