EA not supporting ATI cards? WTF. ATI and Nvidia are like the top dogs in graphics arn't they? If EA doesn't support ATI than they are letting down thousands of gamers who use ATI cards. ATI is the only card I have used in my computer since I bought it. I run a ATI Radeon 9200 Se, because I am limited with a PCI interface. But I love my ATI card and if EA doesn't support ATI than they can just screw off! *Disses EA* W00t!
