---

hi this is my situation:

a few weeks back, I was lookin for skins and came across an M16 skin, so i d/l it. Then after puttin it in my data folder i proceeded to play renegade which opened renguard and i clicked renegade as normal and went to my fav server (Xilserver). but when I got there I got a renguard pop-up sayin "get renguard now etc..."

so I thought it didnt connect to server. So I exited game and ran renguard again, but this time I waited, and it said I been banned for tryin to bypass renguard! why? I did get to use the M16 skin which looked pretty cool, but renguard must think its a cheat the file was called something like M16.w3d, was this file dodgy? and I was wonderin if I could get unbanned coz this is just bogus! I cant stand cheaters and dont really see the point in it. I wouldnt be askin to get unbanned but it sux not bein able to donate to ppl in game, and forcerg those cheatin bastads! so plz consider my case

thanks
