Quote:"Then they began enslaving and humiliating Africans after kidnapping them from their countries and bringing them to America. Millions of blacks were brought to the US and treated with unprecedented harshness. Those who became ill during the journey were thrown overboard to feed the fish."

That's not entirely true. It was the Arabs originally enslaving the Africans. The Europeans just bought them on their Triangular route from Europe to Africa to the Colonies in America. It's amazing how Silwadi just happened to forget that his people had a major part to play in the slave trade.
