Grow up? thats rich.. what are you 13?
Get a life first.

I know what it takes to fund servers.
I'm not an idiot as to what it takes to have a server.
So you know we want to be protective of them, and that we own them.

Granted, I've never actually set one up, but if I got people to do it for me, I'm damn well going to take advantage of it.
Im curious, who might that be then?

That's besides the point, anyways. The fact of the matter is, I don't have stupid rules. I don't ban someone because a word may be offensive.
So if there yelling "GET CANCER AND DIE j_ball430!!!" you woudnt do anything against it? i find that to hard to believe.

I've felt the same pain that you guys have, and yet, I have a different opinion, so take it as it is...
AN OPINION.
An opinion yes, however you do not seem to know that other pll have different oppinions, and those people actually have the access/power to do something against it.

If you don't like it, oh well, ignore it then. You certainly don't help my opinion of MP at all.

I woulndt give a rats ass about your oppinion, its the fact that your publicly flaming MP that makes me write this shit..
About ignoring, if we did that we would get a flame like that every 3 seconds.. or at least every time someone dies.
You DO know that not every country has a 16+ mark on there renegade disc do you? that means young children are playing this game as well. What would you do as a parent (Not that i am, but my immagination on that front is pretty damn good) if your son/daughter of 12~14 would use words like cancer, and "shut the fuck up and die asshole" to just about everyone that does something to him/her that he/she doesnt like.

Immagin that then recomplain about or rules.

As for the circle jerking, I'm not part of a "close community", so I can't say that I've had the "pleasure" of a circle jerk. Wink
lol, figures. so you got no friends he, that would explain a lot

With that being said, I also have 2 words for you:

GROW UP!

Been there, done that.. fuck off and.. erm.. well.. just fuck off >_>
