The things mentioned in banlist.txt do not work. Your best bet is to find out their nickname and ip and add it to your wolbanlist.txt file. If that file does not exist, create it with notepad. The format is like this:

nickname:ipaddress

example

Ircheatr:67.115.208.35

or

Ircheater:*. *.*.*

or

*:67.115.208.35

Good Luck!
