Subject: Scripts.DLL v2.1.1 Request

Here's a stupid question for everyone to mock and ridicule!

Where might I find a copy of Scripts.DLL v2.1.1 so I can play Command & Conquer: Renegade with RenGuard virtually crash-free until Scripts.DLL v2.1.3 is released, eh? I really don't feel like reinstalling RenGuard again. And yes, I will indeed backup the damned thing in future attempts to update it.

Thanks in advance.
