This one went way off!

I can walk about 2 miles in about 40 minutes, give or take.

And on a side note. Although I dont think this has anything to do with anyone, Laptops are not hideously expensive. You can pick a good one up now for about £600 to £700 (,some can be found for £500.) I would rather have my pc though. I don't have to carry my pc from place to place and I don't have to worry about dropping it, or some arsehole making a grab for it.

edit... not really sure about that last part.
