Currently im working on unlocking some of the features that they took out in LE. This isnt the most amazing thing, but it has potential.

So far the things to report are:

Working Strings Export/Import.

Conversation Editor (this may already be in there, but i never saw it)

Anyway, there are some more stuff in there, most wont find it interesting that are not programmers.

Im still havent unlocked the feature i started this for. There is a light tool that they used on all of westwood maps to give it a great look. Bah, ill find it.
