gunners are awesome for rushing, and really aggravating for enemies, the trick with them is to get a lot of them, with gunner rushes i have: killed obs, airstrips, turrets, and refs, but you do need cooperating teammates:

Good rush story: Here is the situation, we took out their ref, bar, and wf by the use of rushes, and they took out our airstrip, obolisk, and powerplant, this is all on mesa and on a marathon server so it was basically a draw. so what we did was...(we were nod we couldn't get gunners) me and literally 9 other people got raves, 10 total, with these, we went along the pp side and all at once shot the pp, before they could try to get over and repair, there pp was almost dead, so we destroyed it and proceeded to nuke the non functional AGT to win the game, GREAT GAME
