C4minerDownload Speed?

Upload Speed?

Cable/DSL/Dial-up/Other?

Use <http://www.dslreports.com/stest>

I'm currently on cable but next week I have to switch over to DSL (cable's boosting their price to \$58/month from \$43/month, DSL is \$35/month), and I'm afraid of getting much lower speeds (like, 384 kbps download speed)...

Download speed: 1788 kbps

Upload speed: 216 kbps

If you are one of the people with AT&T or Comcast, see if you can get Earthlink cable. Earthlink is well rated at [dslreports](#) and is supposed to have 2.0MBS download speeds! Anyway, before you switch, see if other cable isps are available in your area first. Just a suggestion.
