Crimson wrote on Sat, 02 July 2005 19:29 That IP has never been on RenGuard either. I am fairly confident that getting the bot to think you're on RG when you're not is extraordinarily unlikely, especially given the circumstances. I'm not trying to dismiss your accusation. I think given BRenbot thought he was on RG that mac may need to address this.

Um i have a question. Does RenGuard scan for HIDDEN files? What if someone made the cheat file hidden?
