policepolicei have 100KBYTES f u c k e r s...
not Kbits
and i just bought a duel socket AMD Athlon with 1GIG RDRAM
and a geforce 4 TI 4600 AGP 8x
so your the n00b (whoever called me a n00b) and i just host 8 and it starts laggin and secondly I pay 160 $ Canadian for the internet and my ISP is MAGMA Communications....

You pay $160 for a connection that only gives you 100kbps upload bandwidth? I'd like to meet the man who convinced you to pay that much for a sucky connection. ^_^

If you don't want your server to lag, don't host an 8 player server on that much bandwidth. Common sence, my friend.
