Subject: Renegade crasing...
Posted by Viking on Sun, 17 Jul 2005 08:33:16 GMT

Well when I play Renegade it crashes randomly. Somtimes I think it crashes for a reson but the resons are:
1)A bulding blowing up
2)Becon going off
The rest of the time it is so random, I have tryed EVERYTHING to stop it! Dose anyone have any suggestions? I would REALLY like to play a enture 30 minits without having to restart the game.

System Speks:
Windows 2000(Wich I herd is bad for gaming?)

Nvidia gfx card (forget what type but it did it before I got this card)

I use headphones and have no clue what the card is?

So if you know how to make is stop let me know!
