Tecstasy wrote on Thu, 21 July 2005 18:45 You ban me from rg when i tell you about a bypass, wow your cool you guys are shitty programmer's. If something that simple got by that was supposedly fixed, seriously your nothing more then a bunch of geeks sitting behind a comp. What gives you the power to stop me form joining some servers and collecting info from people you didn't make this game you should have no right to. I bet you will delete this topic because its just how sad you are

btw cp1 is gay gay maps and also the damn fog is gay cant even snipe anymore.

Most all of us gamers are geeks sitting behind a comp..no big deal. They are not stopping you from joining servers. The owners of the servers running Renguard are stopping you because they choose to run Renguard to protect themselves and their clients from cheaters...basically YOU. They do have the right to ban your pristine ass from using their software and their server..live with it.

It a good thing that your banned from RG..this way you can protect yourself from the gay maps and gay fog. GG
