The fog does allow you to snipe, however it just increases the difficulty just enough to keep this game one of the hardest to snipe advanced players with. Halo is hard to snipe in, since you have to lead shots, but it still doesnt compete to much with the Renegade difficulty. Tect, you sound like your a little four year old that cheats in every video game he gets, because he isnt skilled enough to go through the game without doing so. I know because i used to do the same thing.

Also, i think im losing my internet connection for awhile. Dunno for sure.
