Goztow wrote on Wed, 27 July 2005 02:30Lijitsu wrote on Tue, 26 July 2005 22:01I cheat to get to the end of the game, see what the ending is, and learn how to get through the levels. After that, i go through games without cheating, so i get the satifaction of beating a game fairly. Of course, in games like Halo, you cant cheat just by typing something in. I went through Halo in about 2 weeks, and beat it easilly. Ive been going through in Heroic to get ready for Legendary, and the extra ending.

You, mister, are an idiot then. Cause then you just cheat to get the element of surprise off, making the game much easier the 2nd time you play it, making you not beat the game fairly really...

And no, I never cheated in Renegade. Last time I cheated must have been in Duke Nukem, with those codes to help you; when I was 15. But that was single player. You can cheat on single player whatever you want in my opinion. It's just fooling yourself.

Oh, would you look at that? Im 13. Ive stopped cheating, really, opting instead to try and see how far i can get without getting completely stuck. Lately ive been boycotting cheating areas of sites, and heading for FAQs instead, and only when im completely stuck. (Ex: Halo, The Maw, at the Cafeteria, 1 health bar, no Silver Elites killed, no Grenades.)
