The RenGuard master servers use a lot of processor, plus we need multiple servers to ensure redundancy. And no, I'm not exaggerating on the cost. For all the servers that I run, it costs me about \$500 US per month. I have three servers, all of which are used by BHS for one purpose or another. Do I profit off this? Hell no. I make pretty decent money as a web developer and I pay the money to keep Renegade alive and to learn by doing.
