There are like 3 different PCT settings:

Main PCT with the zero infantry

Infantry PCT Screen

Vehicle PCT Screen

Make sure you targetted each temp to the appropriate logic.

If you are testing as a mod package, sometimes there's a glitch within the exporting. If you have Renegade running, close that and LE down and delete your mod package file out of the data directory. Re-open LE and export, this happened to me a few times so if you constantly make changes and the changes don't take effect, this could help. Other than that, trail and error. Good luck!

I know this is a little tangent off the topic, but does anyone know about the Mutant PCTs?
