O.K let us change the subject.

I would like to say what would I want from the PS3:

1. Ability to change function of every button to the way you want to.
2. Free on-line gaming
3. More First Person Shooters that allow mouse
4. Ability to open the DVD-rom either from the top (PS1) or from side (PS2) (I know this will not be implemented, but it would be cool)
5. Ability to browse web
6. Ability to play American as well as European DVD movies (not games)

I can't think of anything else right now
