I would like to say what would I want from the PS3:

1. Ability to change function of every button to the way you want to.

Most modern games allow you to do this anyway right?

2. Free on-line gaming

No Chance

3. More First Person Shooters that allow mouse

Likely but who knows?

4. Ability to open the DVD-rom either from the top (PS1) or from side (PS2) (I know this will not be implemented, but it would be cool)

Again, No chance

5. Ability to browse web

Why? Every man and his dog has the internet already.

6. Ability to play American as well as European DVD movies (not games)

This wouldn't really appeal to me as I don't watch many movies. I suppose it would benefit somewhat.

I can't think of anything else right now
