Alyangula wrote on Sat, 06 August 2005 07:52text is funny want to know how to fix display is hard to read,light not displayed brightly and easy to read accidently went into commands and press somthing it came up with (switch) and then the writing (text) was funny and hard to read.

This one took me a while:

[legible]

My text in Renegade is hard to read. The text is too bright. I would like to know how to fix this please.

What happened was I went into commands and typed something. I'm not sure what I typed though.

P.S. Please could you move this to Tech Support
