---

just follow these steps and it should work...

install game  
install patch 1.037  
install rg  
(disable core update)  
login on wol  
(enable core update)  
install core patch  
play it

it might happen that u get problems installing cp without logging in on wol coz rg doesnt detect a nickname, not always but it happens sumtimes... thats the secure way to get over this
