I wish there were a way to play PKG modifications in Skirmish mode. Seriously. Me, being the genius I am, I tried to slap .PKG files into the map list. (Obviously, that didn't work for crap.) Anyway, from what little I was able to see, this is mostly a vehicle and infantry replacement along the lines of "Apocalypse Mod" or "Team Aerial Combat" for Tribes, adding new things, removing others, etc. etc. Nothing too shiny or impressive, I guess.
